Personal website

Github

LinkedIn

Frontend engineer with 4 years of experience in the Svelte and TypeScript ecosystem.
I believe performance and scalability start with quality and planning. I care equally about how things look, how they feel, and how they work, ensuring every detail supports both usability and business goals. With a strong eye for design and strategic thinking, I bring attention to detail and a collaborative, open-minded approach to every project.

Core: TypeScript, JavaScript (ES2022+), Svelte 5 (Runes), SvelteKit, React.

Styling: SCSS, CSS Modules, BEM, Tailwind CSS, Styled Components, Modern CSS

APIs & Data: REST, Firebase / Firestore, Prisma

Tooling: Vite, Webpack, Git, CI/CD, Storybook, Vitest, Jest, Figma

Quality: Accessibility (a11y), SEO, Lighthouse, Core Web Vitals

CMS: Adobe Experience Manager - Authoring, Templates, Experience Fragments

Architecture: Component-Driven Development, Scalable Design Systems. Headless Patterns.

WORK EXPERIENCE

Frontend Developer & AEM

Contractor | April 2026 - September 2026

Delloite · MSC Cruises USA

Delivered React and TypeScript UI on a live multi-market cruise site (search, booking, private area) within an Nx monorepo integrated with AEM. Shipped production fixes and small features in complex flows and extended AEM authoring.

Publicis Group · Haleon - Advil, Sensorials miscrosite, and other brand sites

Shipped frontend for brand pages: layout, components, and styling aligned with design. Built a reusable AEM page template so content teams could assemble brand pages in the CMS.

Web UI Developer | Globant

Contractor | October 2025 - April 2026

- Built a type-safe, modular user interface using TypeScript and Svelte 5 (Runes) for robust, fine-grained state management across complex interactive modules.
- Integrated features with the content management system, enabling drag-and-drop functionality for content editors within the AEM Authoring environment.
- Maintained high engineering standards by ensuring code quality, scalability, and performance across all developed components.
- Contributed to a multi-brand design system of reusable components for Six Flags and Aquarabia to ensure visual consistency across brands.
- Collaborated with backend, design, and content teams to architect the integration of Svelte-driven features within an enterprise AEM-managed platform.

Frontend Engineer | Arts Center

In-house | December 2022 - June 2025

- Rebuilt a niche art gallery into a high-performance, multilingual SvelteKit and TypeScript platform hosting over 300k artworks and served over 12k users, successfully transforming a slow MVP into a production-ready application.
- Led the frontend architecture and UI/UX design, developing core features and the overall product structure from the ground up.
- Achieved 90+ Lighthouse scores by optimizing SEO, accessibility, and Core Web Vitals, significantly increasing platform discoverability and user retention.
- Ensured 100% component stability by implementing Vitest for unit testing and Storybook for comprehensive UI documentation and component-driven development.

Stack: SvelteKit, TypeScript, Tailwind CSS, Prisma, Storybook, Vitest.

Frontend developer | Freelance Projects

Remote | 2021 - 2022

Delivered small-to-mid scale web applications.

Tech: React, Redux, TypeScript, JavaScript, UI&UX, Firebase/Firestore

Projects: React Blog, Filmoteka, Image Finder , Oh my donut, Web Studio

Project manager | Event Designer

Kyiv, 2016 - 2021

Led full-cycle event design production from concept development to execution for corporate and private clients, supervised cross-functional teams and freelancers.

PERSONAL SKILLS

Result-oriented, big-picture thinking, analytical, adaptive learner, collaborative.

LANGUAGES

English - B2

Ukrainian - native

Russian - fluent

Portuguese - A2

EDUCATION

Full Stack Developer Certificate

IT School GOIT | 2021–2022

M.S. in Veterinary Science, Kyiv, 2012–2017
